

**To launch WordPress on USB stick:**

1. Open *xampplite* folder on USB stick.
2. Double-click *xampp-control*.
3. Click *Start* buttons to launch Apache and MySQL (do not check the “Svc” box, though)
4. Once Apache and MySQL are “running” click *Exit* to close XAMPP Control Panel

5. Navigate your browser to <http://localhost/wordpress/wp-admin>
6. Your preset username is *admin* and your password is *password*.

**To conclude WordPress session and safely eject USB stick:**

1. Quit browser session.
2. Open *xampplite* folder on USB stick.
3. Double-click *xampp-control*.
4. Click *Stop* next to Apache and MySQL. Wait for both services to stop.
5. Click *Exit* to close XAMPP Control Panel.
6. Right-click on USB stick in *Computer* directory and choose *Eject*.
